

STORMWATER TREATMENTS - TABLE OF CONTENTS

CHAPTER 1 - INTRODUCTION

Evolution of Treatment Systems
Treatment Technologies
Management Approach to
Stormwater Treatment
Unit Processes and Operations
Principles and the Book's Organization

CHAPTER 2 - STORMWATER QUALITY

Introduction
Characteristics of Interest
Sources of Pollutants
Factors Causing Variability
Chemical Characteristics
Characteristics of Solids
Pathogenic Organisms
Pollutant Accumulation and Washoff
Application to Stormwater Treatment

CHAPTER 3 - CHEMISTRY

Introduction
Basic Concepts
Systems and Processes
Organics
Metals
Colloids
Application to Stormwater Treatment

CHAPTER 4 - CLIMATE

Introduction
Climatic Regions

CHAPTER 5 - FLOW of WATER

Introduction
Water Properties
Flow Regimes
Head and Head Loss
Flow Through Channels
Flow Through Basins
Flow Through Media
Related Concepts
Improving Hydraulic Efficiency
Application to Stormwater Treatment

CHAPTER 6 - REACTOR KINETICS

Introduction
Reaction Order
Experience from Wastewater Treatment
Application to Stormwater Treatment

CHAPTER 7 - GRAVITY SEPARATION

Introduction
Settleable Solids

Types of Sedimentation
Determining Settling Velocities
Settling With Intermittent Flows
Laminar Settlers
Vortex Separation
Flotation
Effect of Non-Ideal Hydraulic Conditions
Experience from Water and
Wastewater Treatment
Application to Stormwater Treatment
Sizing a Settling Basin

CHAPTER 8 - PRECIPITATION

Introduction
Chemical Precipitation
Natural Precipitation
Experience from Water and
Wastewater Treatment
Application to Stormwater Treatment
Sizing a Precipitation Basin

CHAPTER 9 - COAGULATION

Introduction
Destablization
Flocculation
Factors Affecting Coagulation
Determining Optimum Conditions
Electrocoagulation
Natural Coagulation
Experience from Water and
Wastewater Treatment
Application to Stormwater Treatment
Sizing a Coagulation System

CHAPTER 10 - INERT MEDIA FILTRATION

Introduction
Classification of Filters
Pretreatment
Types of Media
Media Properties
Mechanisms of Solids Removal
Operating Head
Underdrain System
Geofabrics
Filtration By Vegetation
Experience from Water and
Wastewater Treatment
Application to Stormwater Treatment
Sizing a Slow-Rate Filter

CHAPTER 11 - SORPTIVE MEDIA FILTRATION

Introduction
Classification of Sorption Systems
Pretreatment

Media
Sorption Processes
Media Capacity
Experience from Water and
Wastewater Treatment
Application to Stormwater Treatment
Sizing a Sorptive Media Filter

CHAPTER 12 - SOIL PROCESSES

Introduction
Characterizing Soil
Soil Processes
Infiltration Systems
Experience from Wastewater Treatment
Application to Stormwater Treatment
Sizing an Infiltration System

CHAPTER 13 - BIOLOGICAL PROCESSES

Introduction
Basic Processes
Biological Communities
Biological Processes
Experience from Wastewater Wetlands
Experience from Wastewater Land
Application
Application to Stormwater Treatment
Sizing a Biological System

CHAPTER 14 - EVALUATING PERFORMANCE

Elements of a Field Program
Laboratory Studies
Using Data from Other Studies

APPENDICES

A. Common Conversion Factors
B. Physical Properties of Water
C. Regional Climate Summary For
Selected Cities
D. List of Astm Methods
E. Qapp Content Checklist

BIBLIOGRAPHY

ACRONYMS AND EQUATION SYMBOLS

INDEX

TABLE of CONTENTS
